## Bräuchler, C. (2018) And now for something completely different—new names in *Clinopodium* with comments on some types. *Phytotaxa* 356 (1): 71–80.

The entry for *Clinopodium barbatum* on p. 73 correctly should read:

***Clinopodium barbatum*** (Boissier (1879: 574)) Melnikov (2015: 107)

- ≡ *Clinopodium serpyllifolium* (Marschall von Bieberstein (1808: 40)) Kuntze (1891: 515) subsp. *barbatum* (Boiss.) Bräuchler (2006: 980)
- ≡ *Micromeria serpyllifolia* (M.Bieb.) Boissier (1879: 574), *nom. illeg.*, non Scheele (1849: 593) var. *barbata* Boissier (1879: 574)
- ≡ *Micromeria fruticosa* (Linnaeus 1753: 593) Druce (1914: 421) subsp. *barbata* (Boiss.) Davis (1951: 77)
- ≡ *Micromeria barbata* Boiss. & Kotschy in Boissier (1859: 14), *nom. illeg.*, non Meyer (1842: 67).
- ≡ *Satureja serpyllifolia* (M.Bieb.) Briq. (1896: 301) subsp. *barbata* (Boiss.) Greuter & Burdet (1985: 305).

**Nomenclatural notes:** When originally published the name *Micromeria barbata* Boiss. & Kotschy was illegitimate being a younger homonym of *M. barbata* C.A.Mey. Due to limitation of priority to the same rank (Art 11.2, ICN) it was however later validated at the rank of a variety (Boissier 1879: 574). Having been published before 1 January 1953 Davis' name based on the illegitimate *Micromeria barbata* Boiss. & Kotschy is an error to be corrected under Art. 41.3, ICN, while author citations in all later names are to be corrected under Art. 41.8(d), ICN.
