RONGQIAN BI, HUA QU, LING LI, CHANGLIN ZHAO & ZAI-WEI GE (2025)
***Inocybe caryicola* (Inocybaceae, Agaricales), a new species from Yunnan, China.**
***Phytotaxa* 718 (2): 96–108.**

1. Fungal Names registration number on page no. 102 (Taxonomy section):
FN572872

Should read
FN572827

2. GenBank accession number for LSU sequence of holotype PV56280 on page no. 102 (Taxonomy section):
PV56280

Should read
PV562801

3. Caption of Figure 3 on page no. 103: "Microscopic features of *Inocybe caryicola*. a-c: basidiospores observed under Scanning Electron Microscopy (SEM) (KUN-HKAS 146978, holotype); d: basidiospores observed under Light Microscopy (LM) (KUN-HKAS 146978, holotype)"

Should read
"Microscopic features of *Inocybe caryicola*. a-c: basidiospores observed under Scanning Electron Microscopy (SEM) (KUN-HKAS 146978); d: basidiospores observed under Light Microscopy (LM) (KUN-HKAS 146978)"
