

Correction to *Phytotaxa* 61: A synopsis of the species of *Cyathea* (Cyatheaceae-Polypodiopsida) with pinnate to pinnate-pinnatifid fronds

MARCUS LEHNERT

Staatliches Museum für Naturkunde Stuttgart, Abt. Botanik, Am Löwentor, Rosenstein 1, D-70191 Stuttgart, Germany.
E-mail: marcus.lehnert@smns-bw.de

After the publication of the synopsis of simply pinnate species of *Cyathea* (Lehnert 2012), it was brought to my attention that I erroneously used *Hemitelia munita* Kuhn (1869: 162) as basionym for a variety in *Cyathea grandifolia* Willdenow (1810: 490) while there already was a validly published varietal name available that takes priority within that rank:

Cyathea grandifolia Willdenow (1810: 490) var. ***bullata*** (H.Christ) Lehnert, *comb. nov.*

Basionym: *Hemitelia bullata* Christ (1897: 81). *Hemitelia obtusa* var. *bullata* (H.Christ) Domin (1929: 71). *Cyathea obtusa* var. *bullata* (H.Christ) Domin (1930: 142). Type:—GRENADA. “In collibus prope Monte Felix,” 1400 ft, 28 November 1889, Eggers 6035 (holotype B!, isotypes F!, NY [holotype fragment]!, P!, US!).

Cyathea munita Kaulfuss (1824: 260), nom. nud. *Cnemidaria munita* Presl (1836: 57), nom. nud. *Hemitelia munita* Hooker (1844: 32), nom. nud. *Hemistegia munita* Presl (1847: 47), nom. nud. *Hemitelia munita* Kuhn (1869: 162). *Cyathea grandifolia* Willd. var. *munita* (Kuhn) Lehnert (2012: 27). Type:—„America,” without date, Palisot de Beauvois s.n., Herb. Willdenow No. 20168 (holotype B!, isotype US [holotype fragment]!).
