Abstract

A widely accessible list of known plant species is a fundamental requirement for plant conservation and has vast applications. An index of published names of liverworts and hornworts between 2011 and 2012 is provided as part of a continued effort in working toward producing a world checklist of this group. The list includes 25 higher taxa, 154 species, 31 infraspecific taxa, and 17 autonyms for 2011 and 2012, 12 of them are fossils. A few taxa not covered by the earlier indices for 2000–2010 are also included. 75 species and 15 infraspecific taxa are new to science.

Key words: Liverworts, hornworts, index, nomenclature

Introduction

Under the auspices of the Early Land Plants Today project, there has been a strong community-driven effort attempting to address the critical need to synthesize the vast nomenclatural, taxonomic and global distributional data for liverworts (Marchantiophyta) and hornworts (Anthocerotophyta) (von Konrat *et al.* 2010a). These endeavours are critical in providing the foundation to develop a working checklist of liverworts and hornworts worldwide; the first version is projected to be published in 2014. This effort is fundamental toward the development of a working list of all known plant species under the auspices of the *Convention on Biological Diversity* (CBD) and the *Global Strategy for Plant Conservation* (GSPC). The significance of this target was underscored again by the Conference of the Parties to the Convention on Biological Diversity who have further developed the GSPC into its second phase (2011–2020), taking into account current and emerging environmental challenges on plant diversity (Blackmore *et al.* 2011). The critical need for this target to be achieved and the implications for conservation, taxonomy, and botanical science were recently outlined by Paton *et al.* (2008). Progress towards the Targets of the *Global Strategy of Plant Conservation* (GSPC) have recently been reviewed by Paton & Lughadha (2011).

This index follows on from the resourceful indices of recent years: Index of Hepatics (Crosby & Engel 2006), the series Index of Bryophytes 2001–2004 (Crosby & Magill 2005) and Index of Bryophytes 2005 (Crosby & Magill 2006), as well as the most recently published Index of Liverworts and Hornworts 2006–2008 and 2009–2010 (von Konrat *et al.* 2010b, Söderström *et al.* 2012d). In the current index we list citations for names published for liverworts and hornworts during the period January 1, 2011 through December 31, 2012. Valid, illegitimate and invalid names that were overlooked by earlier indices (2000–2010) are also included. A bibliography contains complete citations for the places of publication of the names, their basionyms and blocking names. The format generally follows that of previous indices, especially Söderström *et al.* (2012d). Unlike previous indices, basionyms published before 2009 do not have their own entries here. Instead they follow the names of taxa built on them. For fossils we state the geological period. The type taxon is also provided for new higher taxa. All names are arranged alphabetically. Although names that we judge to be invalidly published under the Melbourne Code of Nomenclature (McNeill *et al.* 2012) are included in the list, nomenclaturally they are not accepted by the authors of this index, and therefore not published under the Melbourne Code of Nomenclature (McNeill *et al.* 2012). As in previous indices, no disposition is provided to an accepted name or to the taxonomy.

The number of names validly published during 2011 and 2012 includes 25 higher taxa, 153 species, 31 infraspecific taxa, and 12 fossils. In addition, 17 autonyms were also created. 75 species and 15 infraspecific taxa are new to science.

Format

Authorities and citation abbreviations follow the on-line version of Authors of Plant Names at the Royal Botanic Gardens, Kew, Website (www.ipni.org), which is an updated version of Brummitt & Powell (1992). For nomenclatural elements we follow the Melbourne Code of Nomenclature (McNeill *et al.* 2012).

The following outlines the format for the different categories of names published during the period. At the end of each name, referral to the full citation for the journal/book article in which the name appeared is in the form: (see Malombe *et al.* 2010). Entries may have an annotation in the form of a NOTE near the end. Common reasons for the note are superfluous combinations, blocking names, etc., and era for fossils.

The name of a *new taxon* published during the period takes the form:

Cheilolejeunea ulugurica Malombe, Eb.Fisch. et Pócs, *Acta Biol. Pl. Agr.* 1: 24, 2010 [2011] (see Malombe *et al.* 2010). TYPE: “Typus : TANZANIA, Uluguru Mts, N side of Bondwa peak, 1650–1880 m, 26 Dec. 1985, B. & T. Pócs, 8565/S, (Holotype: EGR, microslide!)”.

Its article from the Bibliography:

Malombe, I., Fischer, E. & Pócs, T. (2010 [2011]) *Cheilolejeunea ulugurica* (Lejeuneaceae, Marchantiophyta), a new species from Tanzania. *Acta Biologica Plantarum Agriensis* 1: 23–28.

A *new combination* published during the period takes the form:

Acromastigum furcatifolium (Steph.) E.A.Br., *Phytotaxa* 65: 58, 2012 (see Brown *et al.* 2012). BASIONYM: *Lepidozia furcatifolia* Steph., J. & Proc. Roy. Soc. New South Wales 48 (1/2): 112, 1914 (see Stephani & Watts 1914).

Its articles from the Bibliography:

Brown, E.A., Söderström, L., Hagborg, A., von Konrat, M.J. (2012) Notes on Early Land Plants Today. 10. A new combination in *Acromastigum*. *Phytotaxa* 65: 58–58.

Stephani, F. & Watts, W.W. (1914) Hepaticae australis. *Journal and Proceedings of the Royal Society of New South Wales* 48 (1/2): 94–135.

One or two asterisks preceding an entry indicate that the name has been interpreted by us as contrary to McNeill *et al.* (2012) being either illegitimate (a single asterisk) or invalid (two asterisks). We give both the article that we base our interpretation on, and a short statement about what we think is wrong. For example:

****Clevea hyalina** var. *rufescens* (S.W.Arnell) Konstant., *Polish Bot. J.* 57 (1): 185, 2012, nom. inval. ICN Art. 41.1; basionym not valid (see Konstantinova & Savchenko 2012). BASIONYM: *Clevea hyalina* f. *rufescens* S.W.Arnell, *Ark. Bot., n.s.* 4 (6): 123, 1959, nom. inval. ICN Art. 40.2; based on more than one gathering (see Arnell & Mårtensson 1959).

A dagger, †, preceding an entry indicates a name for a fossil. For example,

†**Appiana** Steenbock, Stockey, G.D.Beard et Tomescu, *Amer. J. Bot.* 98 (6): 999, 2011 (see Steenbock *et al.* 2011). TYPE: *Appiana sillettiana* Steenbock, Stockey, G.D.Beard et Tomescu.

The index

Acromastigum furcatifolium (Steph.) E.A.Br., *Phytotaxa* 65: 58, 2012 (see Brown *et al.* 2012). BASIONYM: *Lepidozia furcatifolia* Steph., J. & Proc. Roy. Soc. New South Wales 48 (1/2): 112, 1914 (see Stephani & Watts 1914).

Acroscyphella sect. *Tjiwideiensis* J.J.Engel, *Nova Hedwigia* 93 (3–4): 407, 2011 (see Engel 2011). TYPE: *Acroscyphella tjiwideiensis* (Sande Lac.) N.Kitag. et Grolle.

Anastrophyllum aristatum (Herzog ex N.Kitag.) A.E.D.Daniels, D.G.Long, Kariyappa et P.Daniel, *J. Bryol.* 34: 148,

2012 (see Daniels *et al.* 2012). BASIONYM: *Anastrophyllum bidens* var. *aristatum* Herzog ex N.Kitag., *J. Hattori Bot. Lab.* 33: 216, 1970 (see Kitagawa 1970).

Aneura crumii L.Söderstr., A.Hagborg et von Konrat, *Phytotaxa* 65: 43, 2012 (see Söderström *et al.* 2012a). NOM. NOV. PRO *Cryptothallus hirsutus* H.A.Crum, *Bryologist* 99 (4): 438, 1996 (see Crum & Bruce 1996). BLOCKING NAME: *Aneura hirsuta* Furuki, *J. Hattori Bot. Lab.* 70: 317, 1991 (see Furuki 1991).

Aponardia (R.M.Schust.) Váňa, *Phytotaxa* 65: 46, 2012 (see Váňa *et al.* 2012d). BASIONYM: *Nardia* subgen. *Aponardia* R.M.Schust., *Beih. Nova Hedwigia* 119: 360, 2002 (see Schuster 2002).

Aponardia huerlimannii (Váňa et Grolle) Váňa, *Phytotaxa* 65: 46, 2012 (see Váňa *et al.* 2012d). BASIONYM: *Nardia huerlimannii* Váňa et Grolle, *Österr. Bot. Z.* 118 (3): 233, 1970 (see Váňa 1970).

†***Appiana*** Steenbock, Stockey, G.D.Beard et Tomescu, *Amer. J. Bot.* 98 (6): 999, 2011 (see Steenbock *et al.* 2011). TYPE: *Appiana sillettiana* Steenbock, Stockey, G.D.Beard et Tomescu.

†***Appiana sillettiana*** Steenbock, Stockey, G.D.Beard et Tomescu, *Amer. J. Bot.* 98 (6): 999, 2011 (see Steenbock *et al.* 2011). TYPE: “Holotype hic designatus—AW660 Gtop #15. Locality—Appian Way, south of Campbell River, British Columbia, Canada (49° 54' 42" N, 125° 10' 40" W; UTM 10U CA 5531083N, 343646E). Stratigraphic position and age—Oyster Bay Formation, middle Eocene”.

†***Appianaceae*** Steenbock, Stockey, G.D.Beard et Tomescu (fam.), *Amer. J. Bot.* 98 (6): 999, 2011 (see Steenbock *et al.* 2011). TYPE: *Appiana* Steenbock, Stockey, G.Beard et Tomescu.

Archilejeunea nebeliana Gradst. et Schäf.-Verw., *Cryptog. Bryol.* 33 (2): 108, 2012 (see Gradstein & Schäfer-Verwimp 2012). TYPE: “Ecuador, Zamora-Chinchipe: ca 5 km S of Zamora, Parque Nacional Podocarpus, entrance Río Bombuscará, sendero Mirador, 4°06,831'S, 78°58.017'W, on thin trunks in submontane rain forest, 1075 m alt., 25 January 2011, A. Schäfer-Verwimp & M. Nebel 31924, STU, isotype in JE, QCQ”.

*****Aureolejeunea microscypha*** (Hook.f. et Taylor) M.Wigginton, *Moss. Liverw. St Helena*: 25, 2012, nom. inval. ICN Art. 41.5; basionym not cited (see Wigginton 2012b). BASIONYM: *Jungermannia microscypha* Hook.f. et Taylor, *London J. Bot.* 4: 90, 1845 (see Hooker & Taylor 1845).

Bazzania amblyphylla Meagher, *Nova Hedwigia* 92 (3–4): 487, 2011 (see Meagher 2011). TYPE: “Australia – Queensland, Babinda Falls, W.B.Schofield 79821 & M.I.Schofield, 26 Jun 1983. HOLOTYPE: NSW-498536. ISOTYPE: MEL”.

Bazzania dulongensis L.P.Zhou et Li Zhang, *J. Bryol.* 34 (1): 22, 2012 (see Zhou *et al.* 2012). TYPE: “China. Yunnan Prov., Dulongjiang, habitat and altitude unknown, 9 August 1982, M. Zang 2132, Holotype KUN”.

Bazzania fuhreri Meagher, *Nova Hedwigia* 92 (3–4): 488, 2011 (see Meagher 2011). TYPE: “Australia – Queensland [=New South Wales], Tysons Track near Darkwood, E.A.Brown 89/113a, 28 April 1989. HOLOTYPE NSW-436405. ISOTYPE: MEL”.

Bazzania gamscottii Meagher, *Nova Hedwigia* 92 (3–4): 492, 2011 (see Meagher 2011). TYPE: “Australia – Queensland, Little Cooper Creek, Thornton Peak, M.D.Godwin C4298, 11 Jun 1998. HOLOTYPE: BRI-717077. ISOTYPE: MEL”.

Bazzania hainanensis L.P.Zhou et Li Zhang, *J. Bryol.* 34 (1): 25, 2012 (see Zhou *et al.* 2012). TYPE: “China. Hainan Prov., Diaolu, Mengshui Forest Station, on rock along streamlet, 400 m, 27 November 1977, 1977 Collection Team 3314, Holotype IBSC”.

Bazzania orbanii Pócs, *Acta Biol. Pl. Agr.* 1: 16, 2010 [2011] (see Pócs 2010a). TYPE: “Typus: SW Madagascar, Toliara Province, Isalo National Park, “Piscine naturelle”, a deep pool of a brook in a sandstone gorge, shaded by *Pandanus pulcher* trees, at 800 m alt., under overhanging streambank rocks, on soil. Coll. S. Orbán, 9455/J (Holotype EGR, Isotypes MO, TANA)”.

Bazzania tessellata Meagher, *Nova Hedwigia* 92 (3–4): 492, 2011 (see Meagher 2011). TYPE: “Australia – Queensland, Thornton Peak, P.Phillips s.n., 7 Oct 1986. HOLOTYPE: MELU-506. ISOTYPE: MEL”.

Brevianthus flavus* subsp. *crenulatus J.J.Engel, *Nova Hedwigia* 93 (3–4): 406, 2011 (see Engel 2011). TYPE: “Holotype: New Zealand, South Is., Westland Prov., Lake Kaniere Scenic Reserve, Lake Kaniere Rd, 125 m, Engel, von Konrat & Braggins 24815 (F); isotype: (CHR)”. NOTE: This subspecies also creates the autonym.

Caudalejeunea tridentata R.L.Zhu, Y.M.Wei et Qiong He, *Bryologist* 114 (3): 469, 2011 (see Zhu *et al.* 2011a). TYPE: “CHINA. GUANGXI: Shangsi Co., Shiwanashan National Forest Park, between Sanchahe and Zhuijiangyuan, 21°53'695" N, 107°54'459" E, on tree base of *Mytilaria laosensis* Lec., 350 m, 22 August 2010, Rui-Liang Zhu, Yu-Mei Wei & Qiong He 20100822-3A (holotype: HSNU!)”.

*****Cephalozia sanctae-helenae*** M.Wigginton, *Moss. Liverw. St Helena*: 47, 2012, nom. inval. ICN Art. 40.6; type not explicitly indicated (see Wigginton 2012b). ORIGINAL MATERIAL: “[St. Helena] s.loc.spec”.

Ceratolejeunea andringitrae Pócs, Polish Bot. J. 56 (2): 144, 2011 (see Pócs 2011a). TYPE: “SE MADAGASCAR, Ihorombe Region in former Fianarantsoa Province, Andringitra National Park. Montane rainforests on W side of Korokoro River, around Camp II, at 750–1000 m a.s.l., 22°13'S, 47°1–2'E, epiphyllous. Pócs & A. Szabó 9472/AF, 20–23 Sept. 1994 (HOLOTYPE: EGR, ISOTYPES: MO, TAN)”.

Trichocolea japonica T.Katag., *Bryologist* 114 (4): 744, 2011 (see Katagiri *et al.* 2011). TYPE: “Japan. Honshu: Mt. Kaikoma, Southern Japanese Alps, between Kitazawa mountain pass and Sensui mountain pass, ca. 2000 m alt., on wet boulder, 12 June 2010, Katagiri 3198 (holotype: HIRO; isotypes: NY, TNS)”.

Tylimanthus tenellus* var. *diversifolius (E.A.Hodgs.) J.J.Engel, *Nova Hedwigia* 93 (3–4): 403, 2011 (see Engel 2011). BASIONYM: *Tylimanthus diversifolius* E.A.Hodgs., *Trans. & Proc. Roy. Soc. New Zealand* 85 (4): 575, 1958 (see Hodgson 1958). NOTE: This variety also creates the autonym.

Vitalianthus guangxianus R.L.Zhu, Qiong He et Y.M.Wei, *J. Bryol.* 34 (1): 32, 2012 (see He *et al.* 2012b). TYPE: “China. Guangxi, Shangsi Co., Pinglongshan, 21°50'398"N, 107°52'345"E, on tree branches, mixed with *Brotherella* Loeske ex M.Fleish. sp., *Radula oyamensis* Steph., and *R. tjibodensis* K.I.Goebel, 513 m, 17 Feb. 2011, Yu-Mei Wei 20110217-24 (holotype: HSNU!)”.

Acknowledgements

Data were compiled and edited as part of the “Early Land Plants Today Project”. We thank support provided by GBIF (Award No. 2007/41) and the NSF funded project “Bringing Schuster, Standley and Co. Into the Third Millennium: The Field Museum’s 180K Bryophyte and Lichen Conversion & Digitization Project” (Award # 0749762). Funding from the Biodiversity Synthesis Center of the Encyclopedia of Life (EoL) has also greatly helped ELPT towards its overall goals and ambitions of growing into a community-wide effort. We also acknowledge the useful resources TROPICOS and the Recent Literature series of The Bryologist compiled by William R. Buck, Bruce Allen, and Ronald A. Pursell. We have also got help with references from Afroz Alam, Claudine Ah-Peng, Rob Gradstein, Jochen Heinrichs, Tomoyuki Katagiri, Nadya Konstantinova, Itambo Malombe, David Meagher, Tamás Pócs, Alexey Potemkin, Matt Renner, Alfons Schäfer-Verwimp, Sushil Singh, Louis Thouvenot, Jirí Váňa, Martin Wigginton, Li Zhang, and Rui-Liang Zhu. Finally, the authors gratefully acknowledge John J. Engel for access to his personal bryological library.
