

Microchilus dressleri, a new name for *Microchilus campanensis* Kolan. (Orchidaceae)

MARTA KOLANOWSKA

Department of Plant Taxonomy and Nature Conservation, University of Gdańsk, Wita Stwosza 59, PL 80-308 Gdańsk, Poland; e-mail: martakolanowska@wp.pl

A large number of studies on the Neotropical orchid genus *Microchilus* Presl (1827: 94) resulted in over 130 new specific epithets within this taxon since 2002 (eg. Ormerod 2002, 2005, 2007, 2008, 2009, 2013). The name of a new species described in 2014 based on material collected in Panama was identical with the previously published *Microchilus campanensis* Ormerod (2009: 120). A new name for *Microchilus campanensis* Kolanowska (2014: 185) is hereby proposed.

Microchilus dressleri Kolan., *nom. nov.*

Basionym: *Microchilus campanensis* Kolanowska (2014: 185). Type:—PANAMA. Panamá: Distrito de Capiro, Cerro Campana, trocha desde el mirador a la cima, 700–1000 m, 8°41'N, 79°55'W, 12 January 1995, *Galdames 1877 & Guerrera* (Holotype: PMA!).

Etymology:—Dedicated to Robert Dressler, an eminent orchidologist who worked extensively on Panamanian orchids.
