Simpson, M.G. & Rebman, J.P. (2021) Research in Boraginaceae: A new variety of *Cryptantha maritima*, *Cryptantha pondii* resurrected, and *Johnstonella echinosepala* transferred back to *Cryptantha*. *Phytotaxa* 509: 185–210.

Please note the last line of the first paragraph on page 189:

Having only two ovules, the typical feature of *Cryptantha maritima*, is quite rare in the genus overall, only elsewhere found among North American *Cryptantha* in *Cryptantha excavata* Brandegee (1899: 452) (see Johnston 1925: 44).

Should read:

Having only two ovules, the typical feature of *Cryptantha maritima*, is quite rare in the genus overall, only elsewhere found among North American *Cryptantha* in *Cryptantha recurvata* Coville (1895: 165) (see Johnston 1925: 44).

Please note the word *Cryptantha* in Figure 7A & 7B at the top of page 198 was misspelled:

Crypantha pondii

Should read:

Cryptantha pondii
