Majumdar, S. & Panday, S. (2022) Epitypification of *Stachyurus himalaicus* (Stachyuraceae). *Phytotaxa* 538 (3): 265–267.

Please note the Abstract in page 1:

The name *Stachyurus himalaicus* is epitypified here superseding the earlier designated lectotype.

Should read:

The name *Stachyurus himalaicus* is epitypified here because the earlier designated lectotype cannot serve the purpose of precise application of the name.

Please note the last paragraph of the Introduction in page 1:

According to Art. 9.19. Note 7. Shenzhen Code (Turland & al., 2018), we are of an opinion to supersede the lectotypification by choosing an epitype as the designated lectotype is demonstrably ambiguous as it bears only leaves and immature flower buds which cannot be critically identified for purposes of the precise application of the name to a taxon.

Should read:

Thus following Art. 9.9 of Shenzhen Code (Turland & al., 2018), we have designated here an epitype, as the lectotype designated by Su & al. (2020) is demonstrably ambiguous as it bears only leaves and immature flower buds which cannot serve the purpose of precise application of the name.
