LUCAS VIEIRA LIMA & ALEXANDRE SALINO (2022) Reestablishing *Dicranopteris spissa* (Gleicheniaceae, Polypodiopsida) from synonymy, an endemic species from Brazil. *Phytotaxa* 533 (1): 98–104.

This publication is a Corrigendum to Lima & Salino (2022). In the original article, we did not fully refer to the original publication of the basionym of the new proposed combination, which we rectify here. The authors apologize for the mistake and state that this does not change the scientific conclusions of the article in any way.

Taxonomic treatment

Dicranopteris spissa (Fée) L.V.Lima & Salino, *comb. nov.*

Mertensia spissa Fée, *Crypt. Vasc. Bresil* 1: 200, t.73, f.2 (1869). Type:—BRAZIL. Rio de Janeiro. Nova Friburgo. Macaé de Cima. *Glaziou* 2468 (lectotype designated by Lima & Salino 2018, P [P00633241] photo!, isolectotypes P [P00633243], [P00623242] photos!).
