**SK. RASIDUL ISLAM, AMAL KUMAR MONDAL & DEVENDRA SINGH
(2025) *Solenostoma* (subg. *Plectocolea*) *vidyasagariensis* (Solenostomataceae:
Marchantiophyta) A new species from West Bengal, India. *Phytotaxa* 716 (3):
216–222.**

Please note the species name on page no. 216 in Title, Abstract, Introduction, Taxonomic treatment, on page no. 217 in Figure 1, on page no. 218 in Figure 2, on page no. 219 in Figure 3, on page no. 220 in Figure 4, Discussion, on page no. 221 in Discussion and Conservation status:

Solenostoma ‘*vidyasagariensis*’

Should read

Solenostoma vidyasagarianum

Note: In the original paper the epithet in the name of the new species was incorrectly given the geographical termination *-ensis* (see Art. 60 Ex. 20 and Rec. 60D.1 of the *International Code of Nomenclature for algae, fungi, and plants* (Turland *et al.*, 2025). Since our intention was to honour Ishwar Chandra Vidyasagar, as stated on p. 220, and the gender of the genus name *Solenostoma* is neuter (Art. 62.2) the epithet is instead to be formed as described in Art. 60.8(d). Therefore, all mentions of *Solenostoma* (subg. *Plectocolea*) ‘*vidyasagariensis*’ are to be corrected to *Solenostoma* (subg. *Plectocolea*) *vidyasagarianum* Sk. R.Islam, A.K.Mondal & D.Singh.
